

Vector One

Quickstart Guide

Vector One

Last updated November 8, 2024

// 01

What's Included

1. Vector One workstation
2. Power cable
3. Wi-Fi antenna
4. Lambda swag
5. Quickstart guide

// 02

Getting Started

To set up your Vector One, you need to connect your monitor, keyboard & mouse, wired network, Wi-Fi antenna, and power cable. You also need to remove the glass panel films and Instapak foam used to protect your Vector One during shipment.

Note: Ports on your Vector One may be arranged differently than pictured.

// 03

Removing the Packaging Materials

You must remove the Instapak foam and protective films from your Vector One before using it.

Warning: The glass panels are fragile. Handle with care!

1. Open the magnetic glass side panel using the handle near the front of the Vector One and swinging the panel open.
2. Peel the protective films from both sides of the glass panel.
3. Remove the Instapak foam from inside the chassis.
4. Replace the glass panel.

// 04

Connecting Your Monitor

You must connect your monitor to a port on your Vector One's GPU **D** for your Vector One to boot. You may use either a DisplayPort cable or an HDMI cable.

// 05

Connecting Your Wired Network

Connect to your wired network by plugging one end of an ethernet cable into your router, switch, or jack designated by your network administrator. Plug the other end of the ethernet cable into the ethernet port **B** on the back of your Vector One.

// 06

Connecting Your Keyboard & Mouse

Connect your keyboard & mouse to any available USB ports **A** on your Vector One, including the USB ports on the top.

// 07

Connecting Your Wi-Fi Antenna (if included)

Connect the included antenna to the connectors **C** on the rear of your Vector One.

// 08

Connecting Your Power Cable

Connect your Vector One's power supply unit (PSU) **F** directly to a power outlet using the included cord. Ideally, the power outlet is on a dedicated circuit. Make sure your PSU is switched to the | (on) position.

Note: Do not use a power strip, surge suppressor, or uninterruptible power supply (UPS or battery backup).
